EGNN 4 layers, hidden 64, message 32

$$m_{ij} = \mathrm{ReLU}(Wh_i + Uh_j + V\|x_i - x_j\|^2)$$

$$v \leftarrow v + \textstyle\sum_j \tanh(w^\top m_{ij})\,(x_i - x_j) \qquad h \leftarrow h + \mathrm{ReLU}(W[h, \textstyle\sum_j m_{ij}])$$

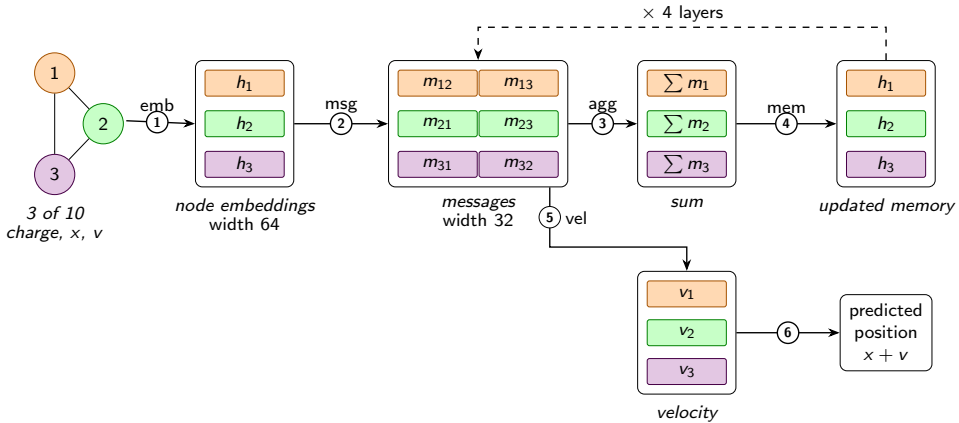

Attention EGNN 4 layers, hidden 64, message 32

$$m_{ij} = \mathrm{ReLU}(Wh_i + Uh_j + V\|x_i - x_j\|^2)$$

$$v \leftarrow v + \textstyle\sum_j \tanh(w^\top m_{ij})\,(x_i - x_j) \qquad h \leftarrow h + \mathrm{ReLU}(W[h, \textstyle\sum_j m_{ij}])$$

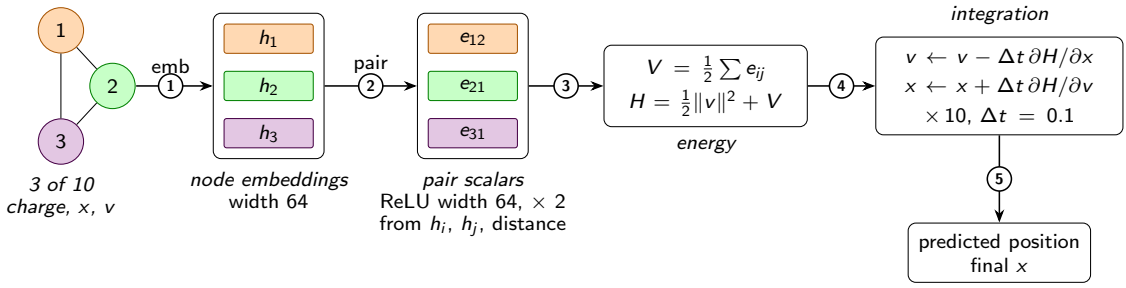

Non-equivariant GNN 4 layers, hidden 64, message 32

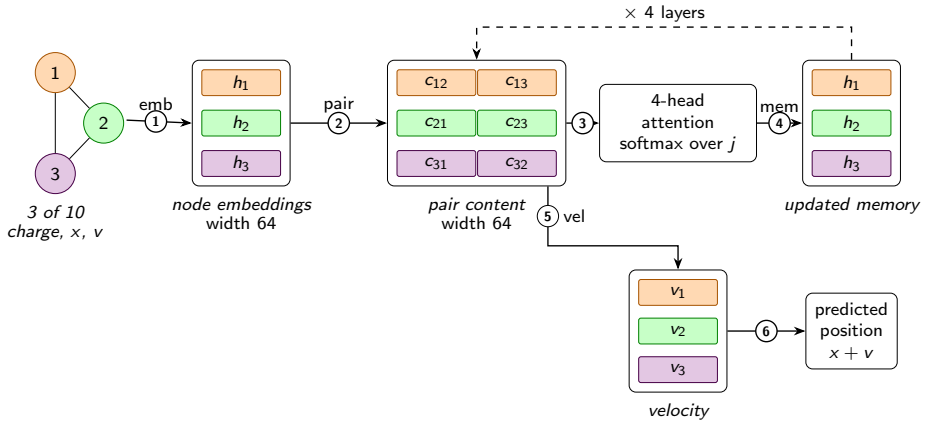

$$m_{ij} = \mathrm{ReLU}(Wh_i + Uh_j + V\|x_i - x_j\|^2 + A[x_i, x_j])$$

$$v \leftarrow v + \textstyle\sum_j \tanh(w^\top m_{ij})\,(x_i - x_j) \qquad h \leftarrow h + \mathrm{ReLU}(W[h, \textstyle\sum_j m_{ij}])$$

Hamiltonian network potential width 64, 2 layers, 10 steps

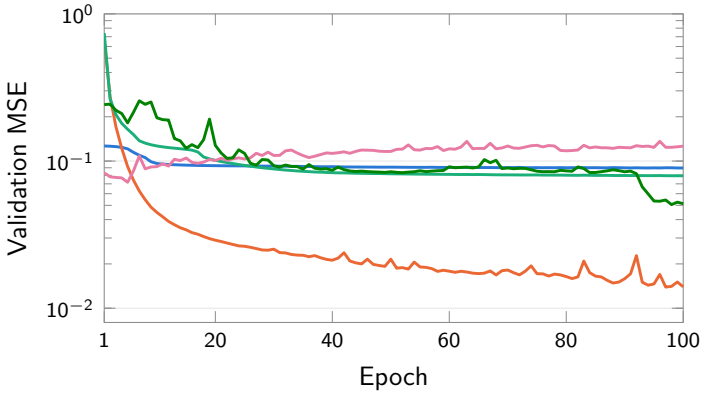

Equivariant transformer 4 layers, hidden 64, 4 heads

$$c_{ij} = Wh_i + Uh_j + V\|x_i - x_j\|^2 \qquad h \leftarrow h + \mathrm{ReLU}(W[h, \textstyle\sum_j \bar{\alpha}_{ij} c_{ij}])$$

$$v \leftarrow v + \textstyle\sum_j \tanh(u^\top c_{ij})\, \bar{\alpha}_{ij}\, (x_i - x_j) \qquad \bar{\alpha}_{ij}\text{: attention weight, averaged over heads}$$

Position error validation MSE over training

Number beside each name: validation MSE at epoch 100.

Probe scores: EGNN

Fact	Embed	Block 1	Block 2	Block 3	Block 4
Charge	1.000	1.000	1.000	1.000	1.000
Distance		0.999	0.982	0.957	0.800
Charge product		0.997	0.362	0.432	0.132
Force magnitude		0.951	0.561	0.468	0.345
Potential energy		0.982	0.897	0.820	0.734
Force direction		0.017	−0.004	0.004	0.004

Validation R^2 of a linear probe. Force direction is a mean cosine, not an R^2.

Probe scores: Attention EGNN

Fact	Embed	Block 1	Block 2	Block 3	Block 4
Charge	1.000	1.000	1.000	1.000	1.000
Distance		0.397	0.741	0.759	0.502
Charge product		0.273	0.480	0.509	0.257
Force magnitude		0.813	0.645	0.706	0.788
Potential energy		0.588	0.761	0.700	0.742
Force direction		0.021	0.026	0.045	0.084

Validation R^2 of a linear probe. Force direction is a mean cosine, not an R^2.

Probe scores: Non-equivariant GNN

Fact	Embed	Block 1	Block 2	Block 3	Block 4
Charge	1.000	1.000	1.000	0.989	0.981
Distance		0.993	0.968	0.944	0.695
Charge product		0.915	0.233	0.091	0.003
Force magnitude		0.860	0.400	0.393	0.240
Potential energy		0.896	0.732	0.632	−2.344
Force direction		0.018	−0.004	0.004	−0.004

Validation R^2 of a linear probe. Force direction is a mean cosine, not an R^2.

Probe scores: Hamiltonian network

Fact	Embed	Block 1	Block 2
Charge	1.000		
Distance		1.000	1.000
Charge product		0.012	1.000
Force magnitude		0.650	0.938
Potential energy		0.056	0.887
Net force		0.085	

Validation R^2 of a linear probe. Net force is a mean cosine, not an R^2.

Probe scores: Equivariant transformer

Fact	Embed	Block 1	Block 2	Block 3	Block 4
Charge	1.000	1.000	1.000	1.000	1.000
Distance		0.937	0.938	0.941	0.943
Charge product		0.000	0.005	0.020	0.040
Force magnitude		0.264	0.267	0.274	0.304
Potential energy		0.000	0.034	0.092	0.360
Force direction		0.129	0.096	0.076	0.041

Validation R^2 of a linear probe. Force direction is a mean cosine, not an R^2.

Deletions

Network	Removed	Before	After
Non-equivariant GNN	Force magnitude, block 1	0.079	0.458
Hamiltonian network	Distance, block 2	0.126	0.323
Equivariant transformer	Distance, block 1	0.051	0.216
Non-equivariant GNN	Distance, block 1	0.079	0.114
Non-equivariant GNN	Charge product, block 1	0.079	0.102
Attention EGNN	Charge, block 2	0.014	0.028
EGNN	Charge product, block 1	0.090	0.103
Hamiltonian network	Distance, block 1	0.126	0.136
Non-equivariant GNN	Potential energy, block 1	0.079	0.086
Attention EGNN	Charge, embed	0.014	0.019
Hamiltonian network	Charge, embed	0.126	0.120

Validation MSE before and after the probe direction is removed.

Assignment 2

Assignment 2 run	Network here	Assignment 2	Here
